

Adecco, the world's leader in HR Solutions, is currently looking for a Data Analyst for one of its major clients.

Employee will create a process and system for the capture of data for use in management of executive programs. Create a database to store records of events and results. Be able to pre-populate by pulling from exiting business objects sources and by dropping in data from survey sources and other external reports.

You are qualified if you have some experience with survey tools; if you are comfortable with mathematics; have taken database classes; if you are organized, detail oriented; and good with data visualization.

Must have Business Objects, MS Excel and Access experience/skills!

Please email resumes to [andrea.guzman@adeccona.com](mailto:andrea.guzman@adeccona.com).

Adecco offers medical, dental & vision benefits, holiday & vacation pay, life insurance & 401(k), employee discount program with retailers, tuition Reimbursement and Computer Training, Weekly Pay, Bonuses/Awards, Direct Deposit
